

## **WHY CHOOSE PARQUET AND OTHER WOODEN SOLUTIONS:**

They are nontoxic hard natural product and as such, ecofriendly, ideal for the use in homes, offices, public spaces, sports facilities and outdoor spaces;

The parquet and other products we produce are manufactured with selected stable seasoned African exotic hard wood, that cannot be attacked by insects and resistant to humidity and easy to maintain;

The finished products portray elegance in appearance, and one feels a sense of comfort when touched.

- They have high and excellent aesthetic qualities;
- High wear resistance;
- Optimal thermo-acoustic insulation;
- Increase in the value of the building or apartment etc. with almost at the same cost or below the cost of other comparative materials. Especially now in Nigeria that the cost of importation of raw materials and finished building materials have gone up;

- Superior living comfort that are expressed as follows:
  - a. Reduction of hibernation of germs because of the absence of open joints, which makes a wooden floor a conducive floor for children and adults;
  - b. It is only parquet that gives you the sense of welcoming because it gives the space warmth and sense of comfort. You can walk bare footed on it. In fact, walking bare footed helps to eliminate stress, favors blood circulation. Children can play on it without the fear of being in contact with cold material;
  - c. It does not emanate toxic elements because it is a natural product and not a synthetic product of laboratory;
  - d. Easy and cheaper to clean and maintain because you only need the passage of a slightly humid cloth to clean. No hash, toxic detergents.
- Flexibility of choice:
  - a. Apart from the vast standard sizes and formats, they can be customized to satisfy your needs, design and style;
  - b. Possibility of choosing different types of wood and thickness;
  - c. They can be installed on any type of hard and dry surface without having to break and demolish the existing floor ( unless when necessary for other technical reasons) in case of renovation;
  - d. Vast economic choice possibilities. This is based on the type of wood and size;
  - e. It is never out fashioned.
  - f. The products can be installed on all dry surfaces or supports, which make them particularly convenient for new construction works and renovation works because they can be installed on existing tiles, marble, granite, sand and cement screeded floors without necessarily dismantling the former.

We give appropriate solutions to the demands of our client and also render advices when requested.

Resistance and durability:

Thanks to selected quality materials, to the modern ways of production, finishing technology and improved maintenance culture, makes the wooden floor the best choice for the environment where it is installed. It makes the

space unique. It becomes an investment that gives you a lot of satisfaction immediately. It last longer than any material because it can be renewed.

A scratched parquet is always more beautiful than a broken porcelain and ceramic tiles. In fact, any sign of wear of a wooden floor contributes in giving it an air of life.

- Sustainability: It is a natural product and it is sustainable for the environment. It does not pollute. All the wood we use are certified by the regulatory authorities.

### **Correction of Wrong Impression:**

Parquet is always a winning choice because it combines class, warmth, and practicability. So, the popular misconception tied to humidity (one wonders what boats are made of), high cost (have you priced imported tiles, marble and granite recently?), installation difficulties (have you seen how we are equipped with the state of the art installation equipment and how we work?) and maintenance problems have to be abandoned.

**Beauty is timeless.**
